

FABER PRESENTS CHLOÈ, THE NEW COUNTRY CHIC HOOD THAT WINKS AT URBAN STYLE

Evoking a retro style but with a contemporary design, the new model offered in four versions has a strong personality given by old fashion finishes

Milan, Eurocucina – FTK, Salone del Mobile 2016. Efficiency and design are the elements that Faber, the company that invented the hood in 1955, expresses once again in the best possible way with **Chloè**, the new country chic model that winks at urban style.

With **Chloé**, the certainties of an established style are renewed to create a modern and versatile hood, perfect both for those who love recreating retro surroundings and for those who are looking for metropolitan and minimal furnishing. The classic trapezoid hood takes on a look in line with the latest indoor trends in four versions: **old metal, old copper, cast iron and old brass**

A fashionable, clean and essential appliance, **Chloè** contains Italian culture, history and tradition owing to its tactile finishes. The special varnishes marked by an innovative formula give the product an unparalleled vintage look that faithfully reproduces the shades of pewter, cast iron, copper and antiqued brass. But that's not all. The special colours ensure long life and maximum resistance to scratches, chemicals and the wear typical of a kitchen space.

In addition to mixing perfection, tradition and innovation within its design, **Chloé** also makes use of an absolutely cutting-edge technology. The **LED Bar** placed at the centre of the external extraction section gives off a homogeneous light on the hob, ensuring very low energy consumption. The **Key 24** instead provides a continuous air exchange with noise that is all but imperceptible. **Remote control** on request and **Delayed switch-off** complete the functions of a hood boasting excellent performance in terms of extraction capacity.

Technical features

Finish: Old Metal (Pewter), Old Copper (Antiqued Copper), Cast Iron, Old Brass (Antiqued Brass);

Width: 70 cm

Controls: Electronic LED

Lighting: LED Light

Grease filters: Cassettes dishwasher safe

Energy Class A

Performance:

- **Air capacity IEC point:** 3 speeds + intensive.

Maximum extraction 590 m³/h, intensive extraction 700 m³/h,

- **Noise level:** maximum speed: 66 db (A); intensive speed, 69 db (A)

Technological benefits:

Delayed switch-off: automatic after 30 minutes

LED Light: latest generation lighting potential combined with excellent distribution of light in the cooking area and pleasing, relaxing light intensity (4100°K), with an energy consumption of only 3W.

Filter alarm: notifies you when it is necessary to clean the grease filter or replace the odour filter.

Hour 24: function which allows the hood to be switched on for 24 hours a day for continuous air renewal with a level of noise.

Remote control: on request, Faber hoods with electronic controls can be used via remote control, which is especially useful for people with reduced mobility.
