

FABER INTERPRETS AND RENEWS THE NEOCLASSICAL AESTHETIC STANDARDS WITH THE NEW CORINTHIA HOOD

With a stylish revamping of the cylindrical hood, the new model is a true demonstration of superior design paired with maximum functionality.

Milan, Eurocucina – FTK, Salone del Mobile 2016. Evoking a timeless style by renovating it. With the new **Corinthia** hood, previewed at the Salone del Mobile 2016, **Faber** offers further proof of its skilful and refined stylistic research, capable of combining new aesthetic standards with maximum hob functionality. With a stylish revamping of the cylindrical hood, the new model is a true evolution of style that renews the aesthetic canons of neoclassicism.

The small facets outlining the hood's perimeter make the appliance's design unique, adding more personality and new light to its silhouette. But that's not all. The base of the hood displays a precious decorative detail: a special circular finish that plays with the contrast of materials to create a striking effect. Thus, three exclusive combinations have been created: the **white matt** version paired with a ring in **tibetan silver**, one in **dark matt grey** with a circular band in **concrete**, and a **stainless steel** model with a **pewter** ring.

In addition to being a high-performing appliance, it is also a furnishing item displays great attention to detail. **Corinthia** is an extractor hood with a contemporary spirit that is suitable for any environment; it is **perfect** for towering over the hob with maximum ease of use thanks to the innovative aesthetic of its **touch controls**, which feature a hybrid design halfway between a circle and a square.

Moreover, **its island installation** makes it the **star attraction in the kitchen**. With a pattern that evokes the architecture of Greek columns in its shape and design, it couldn't be otherwise. Its functionality is also expressed at the highest levels: with its exclusive **Micro LEDs**, the hood illuminates the hob with 6 elegant spotlights. Equipped with an **Evo Diffuser**, it attains optimum results in terms of energy efficiency as well as lower consumption and noise levels. On request, it can be **connected to an induction hob** so that it can be controlled with ease directly from the hob.

Corinthia Island

Technical characteristics

Finish: White Matt/ Tibetan Silver ring; Dark Matt Grey /Concrete ring; Stainless Steel/Pewter ring;

Size: Width 37 cm, Height 77 cm

Outlet diameter: 12-15 mm

Controls: Squarcle Touch

Lighting: Micro LEDs

Grease filters: Cassettes in dishwasher safe

Energy efficiency class A

Performance:

- **Air capacity IEC point:** 3 speeds + intensive.

Maximum extraction 480 m3/h, intensive extraction 600 m3/h,

- **Noise level:** maximum speed: 68 db (A); intensive speed, 71 db (A)

Technological plus points:

Micro LEDs: 6 micro LED spotlights evenly distribute lighting on the hob.

Evo Diffuser: Evolution of an Energy diffuser with an optimised geometry that brings optimal results in terms of energy efficiency and reduced consumption and noise levels.

Remote control (optional): Faber hoods with electronic controls can be operated with a remote control, which is especially useful for people with reduced mobility.

Connection: can be connect to an induction hob.

Intensive speed: function which activates maximum aspiration for 6 minutes to meet special cooking needs.

Perimeter Aspiration: Reduces the perceived sound by 25%. This aspiration guarantees optimised effectiveness exploiting the principle of the Venturi effect: air accelerates as it passes through the constricted extraction space of the panel and then decreases immediately inside the hood and is then easily expelled without need for any particular pressure.
