

WITH HOO-B THE HOOD AND INDUCTION HOB ARE ON THE SAME LEVEL

The exclusive black glass model is paired with the new 30 cm induction hob

Milan, FTK- Salone del Mobile 2016. Eurocucina 2016 is the perfect showcase for presenting two new products from Faber: **HOO-B**, the fitted hood located on the same surface as the hob and, for the first time in the company's history, **3 innovative induction hobs**: the domino hob which, aesthetically, is perfectly in tune with the new HOO-B, and the brand new **60cm** and **90x35 cm** hobs that can be paired with over 40 hoods. A new service with which the company, leader in its field, aims to meet the needs of those who want aesthetically and technologically integrated domestic appliances.

HOO-B COOKTOP, THE NEXT-GENERATION FITTED HOOD

A sophisticated yet minimalist look for the new fitted **HOO-B** hood, which is embellished with a special **aluminium trim** that makes it even more stylish. This model stands out for both its aesthetic and functional qualities: the glass panel fits over the hob without interrupting the continuity of its forms and lines, guaranteeing the utmost quality at all times. The **touch control** commands also make it possible to operate the hood and induction hobs with the touch of a finger. When in use, HOO-B opens, lifting its cover and revealing its extraction surface. When you have finished using it, the cover goes back down to create a single worktop again.

HOO-B also boasts high levels of efficiency thanks to the **Brushless motor**, which guarantees excellent performances and energy savings, and the **Power-off delay** function, which completes the elimination of residual odours. Its energy saving performances are particularly noteworthy: in fact, the HOO-B has a domestic appliance **energy class rating of A+**, a real milestone in the extractor hood sector.

For those that love pure minimalism, the new model also comes in the **HOO-B Glass version** with no aluminium trim. Both versions express the uniqueness of this domestic appliance, perfect for all types of setting: from more modern to more traditional kitchens, its sleek black colour goes wonderfully with every kind of decor.

NEW FABER INDUCTION HOBS: COMFORT IN THE KITCHEN

At **Eurocucina 2016** Faber takes another step forward, presenting a preview of its innovative new integrated domestic appliances, a range of **3 induction hobs with which it will be possible to pair 40 different Faber-branded hoods**. This innovative service is destined to improve our kitchen experience: the two domestic appliances, perfectly connected with each other, offer unparalleled practicality thanks to the commands located directly on the induction zone.

The **3 models in the range** can be chosen according to one's needs. The Faber **FCH34** is the cooktop coordinated with HOO-B. Equipped with 2 induction hobs, this high-performance domestic appliance is perfect for smaller kitchens. The largest cooktop, the **FCH64**, has four hobs of different sizes. Powerful (7400 watts) and equipped with a timer and automatic power-off function, it can be connected to 40 Faber hood models, which can be controlled from the hob itself. Finally, the **FCH93**, 90x35 cm wide with 3 induction hobs for those that like a larger cooking surface and wish to decide what type of cooking hob to use each time. This model is also connected to the Faber hoods.

Technical characteristics HOO-B / HOO-B Glass

Finish: black glass/ aluminium

Size: Width 52 cm

Controls: touch controls

Anti-grease filters: self-bearing, dishwasher safe

Energy Class A+

Performance:

Extraction capacity IEC point: 3 speeds + intensive.

Maximum extraction 540 m³/h, intensive extraction 600 m³/h,

Noise level: maximum speed: 68 db (A) and intensive speed: 70 db (A)

Technological benefits:

Delayed switch-off: allows automatic delayed switching off of the motor to complete elimination of residual odours

Brushless Motor: delivers significant energy savings while maintaining high extraction efficiency. It is the quietest motor on the market, and its performance is stable under all conditions of use.

Intensive Speed: Function which activates maximum aspiration for 6 minutes to meet special cooking needs.

Filter saturation alarm: warns you when it is time to clean the anti-grease filter or substitute the anti-odour filter

Remote control option: on request, Faber hoods with electronic controls can be used via remote control, which is especially useful for people with reduced mobility.

Technical characteristics Induction Hobs:

FCH34

Product size: 29x52 cm

Controls: touch controls

Induction Areas: 2

Power: 3700 watts

FCH64

Product size: 58x52 cm

Controls: touch controls

Induction Areas: 4

Power: 7400 watts

FCH93

Product size: 90x35 cm

Controls: touch controls

Induction Areas: 3
Power: 6700 watts
