

FABER US & CANADA WINS THE ADEX AWARDS: THE GOLD AND PLATINUM AWARDS GO TO STRATUS AND SCIROCCO LUX

Faber, the world's leading name in kitchen hoods, has won two of the most important awards in the architecture and design sector.

Milan, May 2017. Faber, the world's top manufacturer of kitchen hoods for the third millennium, has won two of the top **ADEX Awards**. Faber US & Canada took the Gold and Platinum awards for the **Stratus** and **Scirocco Lux** hoods distributed on the North American market.

"We are very proud to have received these prestigious awards," commented **Riccardo Remedi, Managing Director of Faber**. "Faber has always combined the latest technology with original, functional and attractive design. These awards are clear confirmation that we are moving in the right direction."

The **ADEX Awards** have represented the most prestigious prize in the field of architecture and design since 1994. They are promoted by the **Design Journal**, one of the sector's most influential international publications. A panel of judges select the winners from over 2,500 candidates every year. With this year's win, Faber has reached the final stage of the competition for twelve years running.

Stratus, a flush fitting, ceiling mounted hood that eliminates obstacles over the cooking range, and **Scirocco Lux**, a hood installed inside the kitchen worktop, with an electric motor to raise and lower it, are Faber's most prestigious products for the 2017 American market. High extraction capacity, versatile design and elegant, luxury details have made both models extremely popular with designers and installers alike.

FABER:

First formed in 1955 to process plastics and synthetic resins, Faber began producing kitchen hoods in 1958. The first ever Faber hood was made from Plexiglas. This was the beginning of what has since become the "Fabriano hood manufacturing zone". Passion and commitment to objectives allowed Faber to acquire a growing number of production facilities and expand from a small local company into a European and eventually a global industry. Active on four continents and with factories in Italy, Sweden, France, Argentina, Turkey, India and Mexico plus sales offices in Russia and the USA, Faber is one of the largest hood manufacturers in the world today. The Faber Group is industry leader in Italy, where one hood in two is a Faber hood. The company sells hoods on the international market under its own brand and under the names of local market leaders. As a result of continuous internationalisation and eagerness to take on new challenges, Faber today is a member of the Franke Group, the Swiss leader in kitchen systems. In 2016, Faber implemented a major rebranding. The new tagline, "Air Matters", emphasises the company's long-standing mission: to develop appliances capable of transforming air, optimising comfort and creating a new way of life in the kitchen.
