

## FABER AT KBIS 2018 IN ORLANDO, AMERICA'S TOP FURNITURE EXPO

*Faber, the leading name in kitchen hoods, will be presenting its latest models at America's top kitchen and bathroom show until Thursday 11 January*

**Milan, January 2018.** Faber, the Italian company that invented the kitchen hood back in 1955, will be at the 2018 edition of **KBIS in Orlando, Florida, America's top kitchen and bathroom furniture expo for over 50 years.**

Faber will be at **stand w901** of the KBIS expo until **Thursday 11 January**. The show provides a perfect opportunity for Faber to present its top 2018 models to operators on the important American market for the first time ever. On display will be the latest finishes of **Chloé**, Faber's modern interpretation of the country hood, **T- Light**, the inverted 'T' hood available in island and wall versions, and the timeless classic **Swift**, a built-in hood with modern styling. Also unveiled at the show will be the **Dark Grey** and **Country Grey** finishes of **Chloé**, two elegant new shades that highlight the hood's clean, essential lines. **T-Light** will be making its appearance in **Matt White**, a colour chosen to enhance the luminosity of a hood that is an excellent choice for all styles of kitchen thanks to clean, elegant lines and LED lighting.

Faber is a synonym for technology and energy saving as well as style. The company's stand at KBIS will be exhibiting a series of major innovations designed to reduce consumption and improve the quality of air in the kitchen. One example is **Steam Off System**, exclusive Faber technology that uses air in two ways to eliminate the problem of condensation in the kitchen. While the hood is functioning, helical and variable geometry jets of air are injected into the flow to create vortices that improve updraft and the effectiveness of fume and steam capture.

**FABER:**

*First formed in 1955 to process plastics and synthetic resins, Faber began producing kitchen hoods in 1958. The first ever Faber hood was made from Plexiglas. This was the beginning of what has since become the "Fabriano hood manufacturing zone". Passion and commitment to objectives allowed Faber to acquire a growing number of production facilities and expand from a small local company into a European and eventually a global industry. Active on four continents and with factories in Italy, Sweden, France, Argentina, Turkey, India and Mexico plus sales offices in Russia and the USA, Faber is one of the largest hood manufacturers in the world today. The Faber Group is industry leader in Italy, where one hood in two is a Faber hood. The company sells hoods on the international market under its own brand and under the names of local market leaders. As a result of continuous internationalisation and eagerness to take on new challenges, Faber today is a member of the Franke Group, the Swiss leader in kitchen systems. In 2016, Faber implemented a major rebranding. The new tagline, "Air Matters", emphasises the company's long-standing mission: to develop appliances capable to transforming air, optimising comfort and creating a new way of life in the kitchen.*
