FABER

FRANKE'S AIR EXPERT

FRANKE'S AIR EXPERT.

At Faber, we are proud of our significant heritage.

We invented the first hood in 1955.

Since 1958, we have been offering hoods and air treatment solutions that meet consumer's needs and respect the environment.

Since 2005, we have been the **Air Expert of the Franke Group**, which for over 100 years stands for high quality, innovative engineering and exceptional design. Its recipe for success: building on traditions while creating new things. Together, we have grown successfully over all these years.

In 2021, Franke and Faber brands both became part of **Franke Home Solutions division**, a logical step to expand the Group's presence in the kitchen and conquer new territories together. By joining forces, we are making even better use of our know-how, experience and complementary skills.

We are now taking the opportunity to proudly announce our competence in air treatment and our expert position within the Franke Group.

It's the right moment to take this step forward, as this new endorsement, **Franke's Air Expert**, will enrich Faber and Franke with additional values. That's why, thanks to our leading expertise in air treatment, we are **Franke's Air Expert**.

IMPROVING AIR QUALITY SINCE 1955.

At Faber, we are proud of our significant heritage.

Air is part of our origin and we have a unique expertise in our sector. Over the years we've molded air into a thousand forms, using steel, plexiglass, glass and wood.
We've turned the kitchen hood into an object of design.
We've given it smart functions: light fittings, air conditioner and filters.
In brief, we have connected it to the future.

We understand how the world is changing and we keep innovating to make tomorrow's air even purer.

We are proud to be part of the **Franke Group as its Air Expert**.

A **VISIONE** OF **GLOBAL** REACH.

Faber has a lot in common with air...
both are present all over the world.
This is our task: to improve the air quality in your house and in our planet.

Investing in the world.

Always growing, to serve more people.

Thinking long term.

All-round competence: automation, robotics, IT, total quality.

Innovating continuously.

Engineering research, advanced solutions, living benefits.

Designing the future.

Ergonomics, design, functionality, comfort, style and wellbeing for the home.

OUR FIRST **INSPIRATION: PEOPLE**.

At Faber, we know how to look far but also very close.
We look at people because they are our inspiration.
Their needs and desires are the basic principles for which we strive to supply better and better products, time after time.

We study every single action people do in a Kitchen, even the smallest one. This allows us to offer products realized in accordance with the needs of the people.

Because everything depends on wellness of the people.

SAFETY IS IN **RELIABLE HANDS**.

Reliability is a constant characteristic of all Faber products. When everything is working as it should, home is a more useful place. And when the air is pure and clean, home becomes a place of true functionality.
That's what reliability means to us: making life better for years to come.

RECORDS IN EXCELLENCE

- The first **ISO 9001** Quality Certification in the field of kitchen hoods.
- **SGS Certificate of Excellence n°001**: a worldwide first.
- Integrated Management System for Quality (**ISO 9001:2015**), Occupational Health and Safety (**OHSAS 18001**) and the Environment (**ISO 14001**) certified by SGS.
- Products conforming to the strictest safety requirements and to standards **EN 61591** and **EN 60704-3**, tested in an authorized in-house laboratory, certified and guaranteed by leading international bodies.

INSTALATION
PAG. 352

Advanced technology for real life benefits.

FABER CLOUD

The exclusive Faber Cloud app can be used to monitor the air quality in your kitchen and adjust the main settings of your hood at any time, even from your mobile phone.

K-LINK

With the radio connection between the hood and Faber induction hob, the suction power is automatically adjusted according to the selected cooking level to optimise performance and avoid unnecessary waste.

AIR QUALITY SENSOR

Keep temperature, humidity percentage and the presence of volatile organic compounds under control in the domestic environment.
The sensor automatically adjusts the suction power until perfect air quality is restored.

SIL & STILL

All hoods in the line-up already have a noise level at the maximum power of only 52 dB(A). The Eco Function can be activated by combining the effects of SIL & STILL TECHNOLOGY and the exclusive BRUSHLESS motor, for continuous 24-hour, energy-efficient air exchange in the surrounding environment, silently below 40 dB(A).

UV-C LAMP

Kills viruses and bacteria with maximum safety without producing ozone.

STEAM OFF SYSTEM

The dual action of the air entirely eliminates the condensation effect. The hood sucks in and at the same time emits jets of air that create a vortex to accelerate and facilitate conveying and capturing steam.

ZERO DRIP

Stop condensation! Zero Drip collects it in a frame preventing it from dripping onto the hob. Zero Drip Plus makes it evaporate thanks to the specially heated glass of the hood.

AIRLANE

Maximum suction through an invisible passage. A second motor in the ceiling is activated automatically when the hood is switched on.
Fumes and steam are captured by the second motor to purify the air of the entire environment and ensure maximum comfort.

UP & DOWN

The hood descends onto the cooker hob to optimise suction and then rises and disappears completely into the ceiling when it has finished, clearing the space altogether.

NAUTILUS

More power, less noise, superior comfort! Faber technology increases suction capacity by 30 m3/h, reduces noise and improves efficiency, always with minimal consumption.

ARIES

With the power of two brushless motors, Aries achieves a suction capacity of over 700 m3 abating noise by 9 dB(A). The superior, energy-saving and quiet performance of Aries puts vertical hoods in Class A.

SOUND PRO

Reducing turbulence and swirls in the internal airflow, the new blowers technology succeedsin both limiting noise and improving the sound quality of the hood.

BRUSHLESS

The brushless motor guarantees considerable energy saving coupled with high extraction efficacy. It is the most silent motor on the market and its performance remains stable in any usage condition.

REMOTE BLOWER

Available on many products, it allows you to install the motor away from the hood to reduce the noise in the kitchen. For acoustic comfort at the highest level.

PERIMETER ASPIRATION

25% less* perceived noise. Perimeter suction exploits the Venturi effect to accelerate the air flow through a narrow gap. The air slows down again once inside the hood for more efficient extraction.
*Equivalent to a reduction of 3 dB(A) according to EN 60704-3.

WATERPROOF

Any liquid spilled during cooking flows directly into a suction grille and is collected in an automatically drained tray under the hood, small enough to leave space for a utensil drawer.

POWER MANAGEMENT

Adjustable absorption setting on 4 power levels (KW). No more blackouts at home!

HFH FILTERING

Capable of eliminating 95% of bad smells, the technology guarantees maximum effectiveness in activated carbon filtering. HFH technology makes the hood more efficient for air purification from all odours.

FILTER ALARM

Filter saturation alarm: warns you when it is time to clean the anti-grease filter or substitute the anti-odour filter.

REAR OUTLET

The rear air outlet available with many FABER hoods allows fumes to be channelled to the rear instead of upwards. This eliminates the need for an upper duct, freeing up useful space above the hood.

SELF START

A special sensor switches the hood on as soon as air temperature reaches 35°C. A smart sensor activates your hood automatically whenever needed. Faber loves to make cooking easier and more enjoyable!

AUTOMATIC FUNCTION

The hood will turn on at the most suitable speed automatically, adapting the extraction capacity to the maximum cooking level.

DELAY 30

Automatic shutdown delay: you can postpone the motor shutdown to eliminate residual odours completely.

BOOST

Thanks to the Double Intensive Function. Even the most persistent cooking steam and smells are eliminated in just a few minutes.

HOUR 24

Key 24: function which allows the hood to be switched on for 24 hours a day for air renewal with a level of noise that is imperceptible.

SPEED I

Intensive speed: function which activates maximum aspiration for 6 minutes to meet special cooking needs.

LED LIGHT

Thanks to the LED lighting you will have a brilliant light and excellent visibility over the entire cooking area, with a considerable energy saving.

LED LIGHT DIMMER

Dimmable light: at the touch of a button the light is dimmed down and can be left on for a long time with minimal energy consumption.

SOFT TOUCH

FENIX®,a high-tech material with unique characteristics. Soft and smooth to the touch, matte and smudge-proof surface.

TOUCH CONTROL

Extremely comfortable, user-friendly Touch Slider controls.

TUNABLE WHITE

On some models, you can choose and vary the colour temperature of the light, from warmer (tending to yellow) to colder (tending to white).

ANTI TOUCH

Special smudge-proof materials for a perfectly clean hood and a surface without annoying stains.

REMOTE CONTROL

The remote control is compatible with many Faber hoods. To adjust suction and special functions, such as the courtesy light, 24H, Up&Down and Steam Off features. Controlling your hood is easier than ever.

K-LINK TECHNOLOGY AND THE HOOD ADJUSTS ITSELF AUTOMATICALLY

FREE HANDS IN THE KITCHEN. THANK YOU, FABER
The beauty of cooking is also that you can express yourself freely, without distractions. If you have an induction hob and a Faber cooker hood with K-LINK connection, just start cooking and the suction power of the hood automatically adjusts to the selected cooking level.

HOB AND HOOD DIALOGUE WITH EACH OTHER
Faber has created an intelligent connection between hob and hood, through an integrated system that works with radio waves. A simple gesture is all it takes to set the hood to automatic operation. The system is always active because the radio signal is never interrupted.
At the same time, the perfect operation of the hood is guaranteed avoiding the waste of energy and excessive noise that you could have set the suction at a level too high compared to the produced fumes.

AUTOMATIC ADJUSTMENT OF THE HOOD POWER TO EXTRACT VAPOURS AND ODOURS.

The connection is always active even in the presence of dirt residues on the hob.

It can be controlled manually whenever you want.

Hood Models compatible with Faber Induction Hobs.

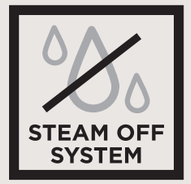
CONDENSATION IS NO LONGER A PROBLEM



FABER ELIMINATES THE PROBLEM OF CONDENSATION
Eliminating condensation is essential to protect the wall unit where the hood is installed and to prevent drops of moisture from falling onto the hob. Faber has succeeded by creating special anticondensation systems of total effectiveness.

STEAM OFF SYSTEM
The Steam Off System implementing Faber exclusive technology eliminates the problem from the beginning, avoiding the formation of condensation. While sucking in, the hood emits controlled jets of air that by whirling and accelerating, promoting the upward movement and convey the vapours to capture them all.

ZERO DRIP
The Faber Zero Drip and Zero Drip Plus systems stop condensation after it has formed. The first one collects it in a groove preventing it from dripping onto the hob. The second makes it evaporate through contact with specially heated surfaces.

STEAM OFF SYSTEM

QUIETNESS THAT RESPECTS NATURE

THE FIRST COMFORT IS SILENCE
To make the kitchen a comfortable environment to live in, it is essential to have a hood that works making as little noise as possible, even at top power.

SOUND PRO NEW
Reducing turbulence and swirls in the internal airflow, the new blowers technology succeeds in both limiting noise and improving the sound quality of the hood.

BRUSHLESS MOTOR
Faber is constantly looking for technologically advanced solutions and with this motor, it guarantees the best energy efficiency on the market.

SIL & STILL TECHNOLOGY
Based on the study of aerodynamic flows inside the hood and targeted sound insulation, this Faber technology reduces noise at top power to just 52 dB(A). By activating the Eco Function, it ensures continuous air exchange in the surrounding environment for 24 hours, silently and with minimum consumption below 40 dB(A) comparable to the quietness of a library.

REMOTE BLOWER
The noise of the hood can be minimised by moving the motor away.

SOUND PRO

- ► FLUID DYNAMIC OPTIMIZATION
- ► NOISE REDUCTION
- ► SOUND QUALITY OPTIMISATION

HUSH, IT'S COOKING TIME!

SOUND PRO NEW

As kitchens become places for meeting and sharing moments at home, hoods increasingly need to combine high performances with silent motors. Following in-depth studies and extensive research, Faber was able develop a solution: Sound PRO.

FLUID DYNAMIC OPTIMIZATION
Thanks to an innovative design, the new blower significantly reduces turbulence and vortex of the internal air flow.

sound quality optimization

NOISE REDUCTION AND SOUND QUALITY OPTIMIZATION
At maximum power, the new technology limits the noise threshold of the hood up to -6db*, but it doesn't stop there. It also optimizes the sound produced, reducing the disturbance caused by high frequencies.

Available in several Faber models, check the icon on the individual product sheet.

*Data varies depending on the model in which the blower is installed.

Models with technology SIL & STILL

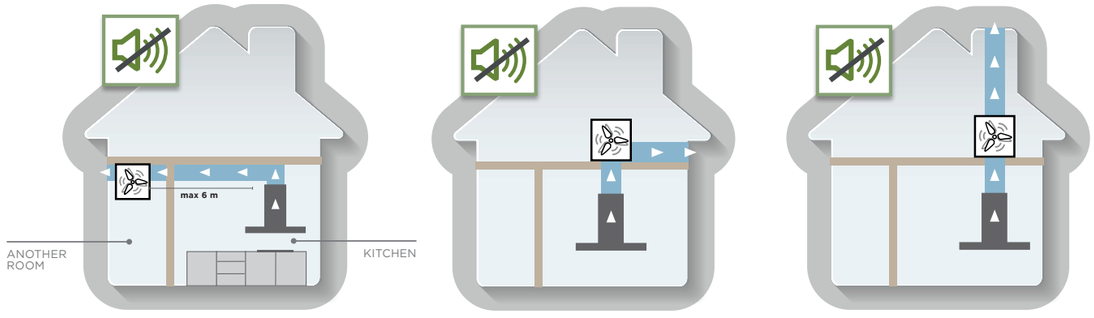
THE SILENT PLEASURE OF A REMOTE MOTOR

REMOTE BLOWER

REMOTE SUCTION KIT
The remote suction kit, with the utmost simplicity, makes it possible to move the hood motor away from the cooking area.

THE SILENCE INCREASES SIX METRES AWAY
With the Remote Suction Kit, the motor can be moved to another location of the house up to six metres away from the hood. Minimal noise and maximum comfort are ensured not only in the kitchen but also in the living area.



The model with the dedicated range of hoods is shown in the Accessories section on page 342

REMOTE EXTERNAL MOTOR
The remote external motor makes it possible to install the motor entirely outside the house and eliminate noise altogether.

The model with the dedicated range of hoods is shown in the Accessories section on page 342

SOFT LINE REVOLUTIONISES DESIGN

Soft Line is the Faber range of hoods made with FENIX®, a high-tech material with unique characteristics. The matte, smudge-proof surface is soft to the touch and reflects very little light. It is non-porous to facilitate daily maintenance and cleaning.

FENIX® is a material with high resistance to scratches, abrasions, dry heat and acids. Its properties make it perfect for kitchens. Another characteristic is that it can self-heal surface micro-scratches.

FENIX®

USED AS A KITCHEN TOP IT IS A PERFECT MATCH FOR THE HOOD.

The Faber Soft Line consists of a suspended hood F-light (Soft Cube) and two vertical wall-mounted hoods (Soft Edge e Soft Slim).
They are all available with three FENIX® finishes: Grigio Londra, Bianco Kos or Nero Ingo.

SOFT CUBE

SOFT EDGE

SOFT SLIM

AIRLANE TECHNOLOGY
SUPERB EXTRACTION THROUGH AN INVISIBLE DUCT

REAL POWER MAKES NO NOISE.
IT KEEPS THE SECRET.
AIRLANE TECHNOLOGY can be used to install more than one Faber suspended hood in suction mode without the presence of unsightly connection pipes. In this way, you can have a hood and light cluster that integrates perfectly into the décor of your kitchen.

THE POWER OF A DOUBLE SUCTION.
With AIRLANE TECHNOLOGY a second motor in the false ceiling conveys fumes and cooking vapours sucked from the hood without piping.

Airlane conceals a second motor in only 30 cm of false ceiling allowing you to choose between four air outlet positions during installation.

UP&DOWN TECNOLOGY
FREEDOM OF MOVEMENT IS IN THE AIR

In open-concept kitchen and living room combos and in those where space is restricted, there is often the need to choose a suspended hood with a design matching the interior décor.
Faber solves these needs by combining the function of a hood with that of a light fitting.

THERE'S A HOOD: IT'S IN THE LIGHT FITTING.
With the Up & Down technology, Faber perfectly integrates hood and light fitting, combining the needs of aspiration with those of design and lighting.

AN AMAZING SPACE-SAVING SOLUTION.
These hoods are excellent space-saving solutions capable of illuminating and enhancing any type of environment, from the most linear to the most sophisticated.

UP & DOWN: NICE MOVE IN THE KITCHEN.
DOWN: The hood moves down to illuminate the hob and optimise suction while cooking.
UP: The hood returns to the ceiling to form an elegant light fitting. And FABER's brand-new remote control makes movement easy.

F-LIGHT: MOVE IN CLASS A.
All F-Light models with their energy efficiency go far while bringing comfort closer.

HIGH FILTERING
NO BAD SMELLS

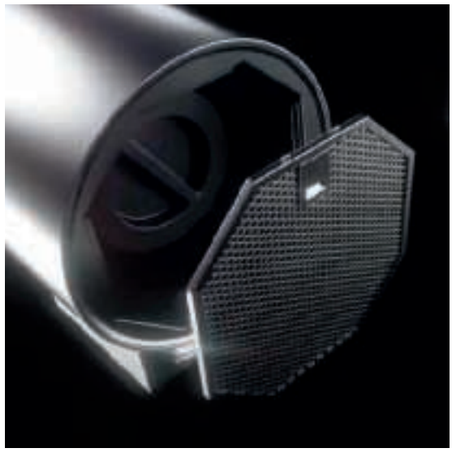
HIGH FILTERING

ONLY FABER HOODS ELIMINATE 95% OF ODOURS.
What's the most effective activated carbon filtration technology? It's called HFH, which stands for "HIGH FILTERING HOOD". And it's a FABER exclusive, of course. HFH improves hood performance by removing odours from the air almost totally.

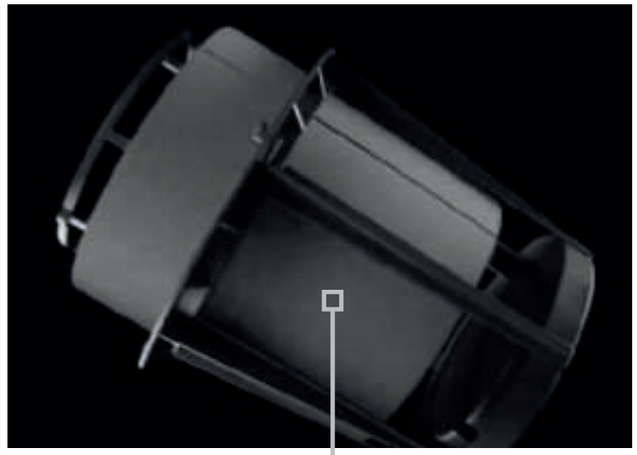
A LARGER SURFACE AREA AND TWO LAYERS OF ULTRA-EFFICIENT FILTER MATERIAL.
Faber's potent HFH technology is based on a cylindrical filter design with a far larger surface area. It's twice as effective too, because it uses two high-effciency filtration layers with different porosities and activated carbon concentrations. That's how the filter captures both large and small particles.

FABER MAKES THINGS EASIER...QUIETLY.
Unlike other activated carbon filter systems, HFH also reduces noise by around 3 dB(A). And the smart, cylindrical shape of the filter makes easy work of removing the dishwashercompatible filter material.

THE MAXIMUM EFFECTIVENESS OF ACTIVATED CARBON FILTRATION TO ELIMINATE 95% OF ODOURS



The **easy-to-install** cylindrical filter has a larger area compared to onventional ones guaranteeing more effectiveness.



Ultra-filtering material consisting of two panels with different porosity and concentration of active carbon. The first layer captures the coarsest particles and the second smaller ones, increasing effectiveness even more.

Dishwasher safe.

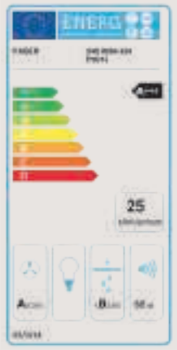
GREEN INNOVATION
THE FUTURE IS IN OUR HANDS

WE ALSO THINK ABOUT THE PLANET
Making sustainable choices is essential to respect the world we live in. Therefore, it is important to choose a hood that is energy-efficient. By developing solutions aimed at lower environmental impact and greater energy savings, Faber also takes care of the planet

LED LIGHT
All FABER hoods incorporate LED lighting technology. The LED units consume next to nothing and produce a pleasantly natural light that ensures perfect visibility without altering colours

HIGHER CLASS ENERGY
Today, Faber hoods are confirmed in the highest energy classes. They ensure superlative performance and minimum consumption of the suction motor, filtering system and lighting. The top-of-the-range Galileo hob extractor achieves excellence in Class A+++.



Energy Efficiency Class: hoods with the highest ratings (A++, A+, A) consume less and are more respectful of the environment (green colour).
Annual Electricity Consumption: calculated for standard hood functioning times (60 minutes of suction and 120 minutes of lighting a day).
Fluid-dynamic efficiency: reveals the quality and power of the hood: efficiency rises as suction power increases or energy consumption decreases.
Lighting efficiency: this indicates how much light the hood produces for the energy it consumes; for the same lighting power, more light-efficient hoods consume less.
Filter efficiency: indicates the filter's capacity to capture grease.
Noise level: measured in dB at the hood's maximum fan speed (not boost).

LET **PURITY** IN

TAKE CARE OF THE AIR YOU BREATHE IN YOUR HOME.
The quality of the air in domestic environments is an increasingly important issue. Faber are therefore bringing their technology and experience in air to the service of well-being with an ecological system that meets people's needs.

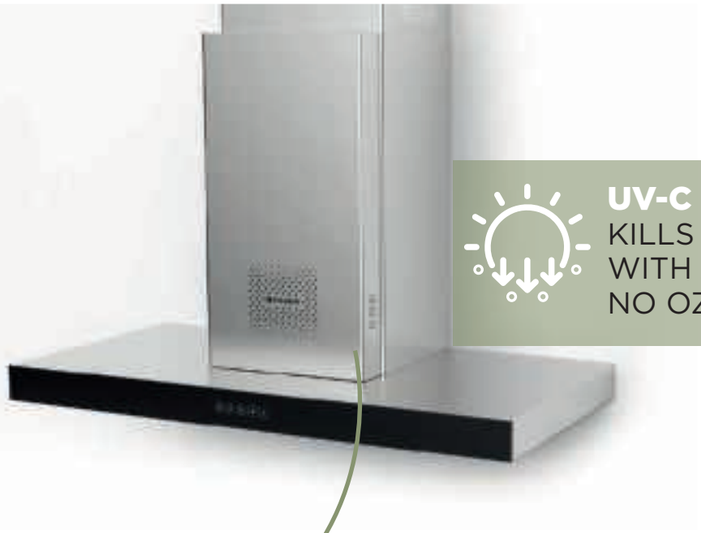
AIR HUB:
TWO PRODUCTS IN ONE FOR PURE WELL-BEING
A system to disinfect the air and a T-shaped hood - this is the dual nature of the Air Hub, a unique, dual-function product in a simple, elegant design, perfect for any style of interior.

AIR HUB

THE PUREST AIR EXPERIENCE

Air Hub guarantees clean, safe air for your kitchen and living environments. In fact, thanks to its UV-C technology, **it eliminates up to 99.99% of viruses and bacteria***, all without using chemicals.

*Laboratory tests carried out on E.coli and Staphylococcus aureus by the University of Siena.



UV-C LAMP TECHNOLOGY
KILLS VIRUSES AND BACTERIA WITH ABSOLUTE SAFETY AND NO OZONE PRODUCTION

MANUAL: Start the disinfection of the air. You can switch off manually, or it will automatically switch off after 24 hours.

INTENSIVE: Maximum speed of disinfection in the shortest possible time. Switches off automatically.

NIGHT: Long cycle for complete disinfection with the minimum level of noise. Automatically switches on each night.

AIR TREATMENT

AIR TREATMENT
SMART HOODS

FABER CLOUD

AIR QUALITY SENSOR

HOODS CONNECTED TO YOUR WORLD
All hoods in the AIR TREATMENT by Faber range fit an Air Quality Sensor. This innovative device monitors the air and activates suction if it detects the presence of allergens, pollutants or odours. By storing data on the Faber cloud, via an app that can be downloaded to smartphones, you can monitor the air quality at home at any time, even remotely.

K-AIR WITH INTEGRATED MONITOR
K-Air is an intelligent vertical hood with a built-in 21” monitor that can be controlled directly via the touchscreen or app. The exclusive Sensor Air Quality keeps the temperature, the percentage of humidity and the presence of volatile organic compounds (VOC and VOC), Carbon Monoxide and Nitrogen dioxide and methane under control in the domestic environment. The sensor activates the hood as soon as pollution thresholds are exceeded, primarily in the space where you cook.

THE IDEAL SOLUTION FOR YOUR **SMART HOME**

MONITORS INDOOR AIR QUALITY AND RESTORES FRESH AIR IN YOUR KITCHEN

YOUR FAVOURITE WEB PAGES ACCESSIBLE ANYTIME, CONNECTION TO YOUR INTERNET BROWSER
(AVAILABLE ON K-AIR MODEL)

THANKS TO THE FABER CLOUD, YOU CAN ACCESS IT FROM ANYWHERE AND CHECK YOUR HOME ENVIRONMENT

ALL FUNCTIONS CAN ALSO BE MANAGED VIA THE FABER APP

REMOTE **MANAGEMENT** TOO

THE IDEAL SOLUTION FOR YOUR SMART HOME.

The exclusive App is designed to monitor air quality in your kitchen and manage the hood remotely too, with simple and intuitive functions.

A RANGE THAT IS **ALWAYS CONNECTED**

AIR TREATMENT by Faber is a complete range comprised of vertical, ceiling, T-shape and built-in hood models. All the hoods are equipped with an Air Quality Sensor, connection to the Faber Cloud and can be controlled remotely via the App. In addition, the K-air model comes equipped with the exclusive 21.5 inch integrated monitor.

TECHNOLOGICAL PLUS

MOBILE APP VIA FABER CLOUD
Mobile APP via Faber Cloud keeps you informed through the dedicated app when it reaches unsafe conditions, allowing remote control too.

AIR QUALITY INDICATOR
constantly monitors Indoor Air Quality in your kitchen.

AUTO FUNCTION
it automatically sets and controls the aspiration phase to remove pollution and restore fresh air in your kitchen.

RECIPIES PLAY VIDEO
Full web browser and audio di users. Hear your favourite music or cooking assistant THROUGH (non true!) video recipes.

FULLY INTEGRATED WHIT AMAZON ALEXA
Use voice control to switch on/off the hood, set aspiration level and control the lights.

CONNECTED TO YOUR HOME ADDITIONAL DEVICE
Connect your wi-fi / IP remote cameras. Always visible directly into your hood monitor.

MULTIPLE TIMER
Multiple Timer management.

SHOW YOUR FAVORITE
Your favourite picture slideshow in the Kitchen.

TOUCH MONITOR 21.5
21.5 inches touch display.

TUNABLE WHITE
Set dimmerable white LED intensity.

ASPIRATION HOB

GALILEO 99

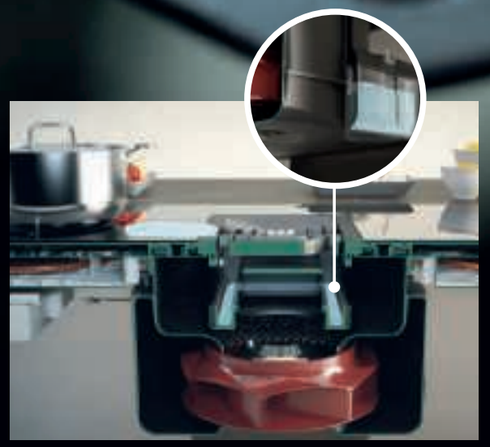
GALILEO 60 105

GALILEO SMART 103

GALILEO.
Simply genius.

A+++ ENERGY

THE MOST EFFICIENT.
The pinnacle of aesthetic perfection with the integration of cooktop and hood in a single product for outstanding performance.



WATERPROOF

MAXIMUM SAFETY IN THE KITCHEN.
Waterproof technology guarantees operation and safety even in the event of liquids spilling onto the cooktop. They do not interfere with the cooking and are collected in a special compartment below.

SUCTION SPEED

THE MOST EFFECTIVE.
With its clever fl uid-dynamic design, Galileo stands out for its high collection capacity of up to 6.6 metres per second. Even the most persistent cooking vapours and smells are eliminated in just a few minutes.

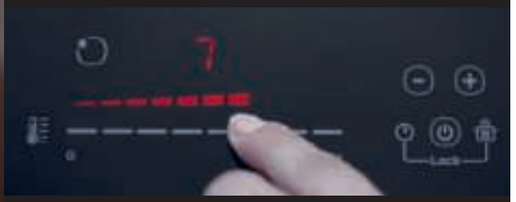
EASY TO USE.
The cooktop surface is smooth and seamless allowing dirt to be removed in one simple step.

SPACE SAVING

SPACE SAVING.
In the base cabinet Galileo has a smart drawer where you can easily storage cooking utensils.

TOUCHSLIDER

EASY TO USE.
The convenient and user-friendly touch slider controls allow you to adjust the cooking zones and the suction level with a simple action.



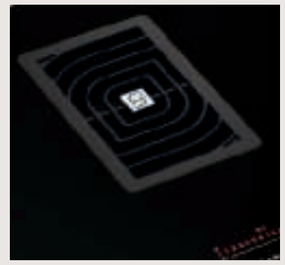
[2] BRIDGE ZONE

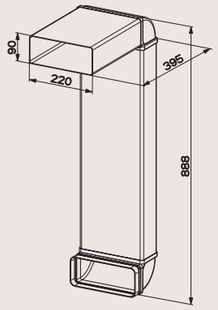
UNLEASH YOUR CREATIVITY.
The cooking zones can be activated in combined mode to use them together with the same level of power, ideal for cooking food in large pots.

USEFUL
The grease filter is extremely effcient and is also functional because it works as the first barrier and can collect up to 0.5 litres of liquid. It is easily removable and dishwasher-safe.

GALILEO
INSTALLATION KIT

VENTING HOBS.
To install Galileo venting hobs, you will need to buy the relevant installation kit. Different kits are available, depending on your desired model and configuration, suction or filter. The details of each individual kit, with the components included in the packaging, are outlined below.

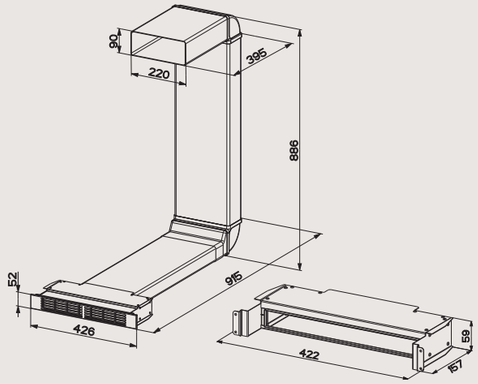




DUCTING KIT SUITABLE FOR ALL GALILEO RANGE*

Ducting kit
cod. 112.0540.782

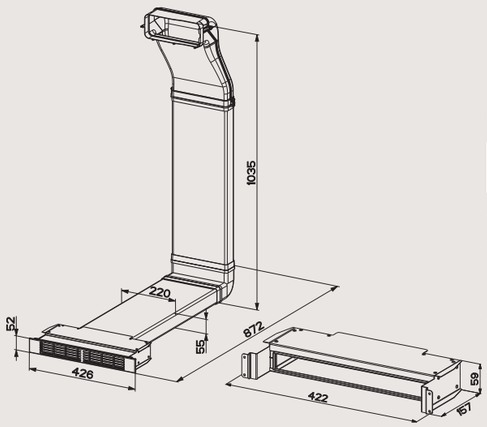
- 1 x flat duct, 200 x 90 x 300 mm
- 2 x vertical 90° bends, 220 x 90 mm
- 1 x flat duct, 200 x 90 x 700 mm
- 1 x duct adapter



KIT GALILEO 80*

Recycling kit H60
cod. 112.0540.730

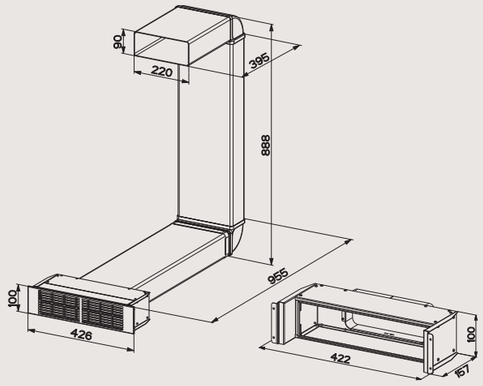
- 1 x flat duct, 200 x 90 x 300 mm
- 2 x vertical 90° bends, 220 x 90 mm
- 1 x flat duct, 200 x 90 x 700 mm
- 1 x flat reducer, 90-55 mm
- 1 flat duct, 220 x 55 x 60 mm
- Recycling kit H60



KIT GALILEO 60*

Recycling kit H60
cod. 112.0626.656

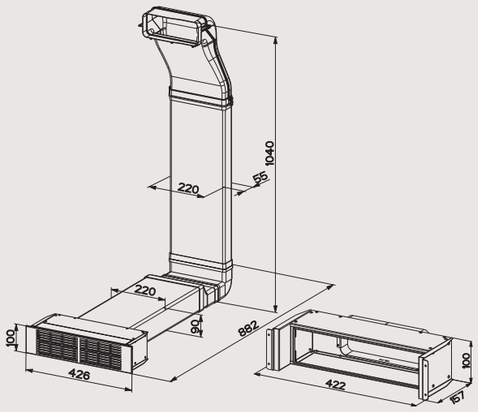
- 2 x vertical flanges (rear and front) for connection to the motor
- 1 x flange with seal, 220 x 55 mm
- 2 x flat ducts, 220 x 55 x 60 mm
- 1 x vertical 90° bend, 220 x 55 mm
- Recycling kit H60



KIT GALILEO 80*

Recycling kit H100
cod. 112.0540.781

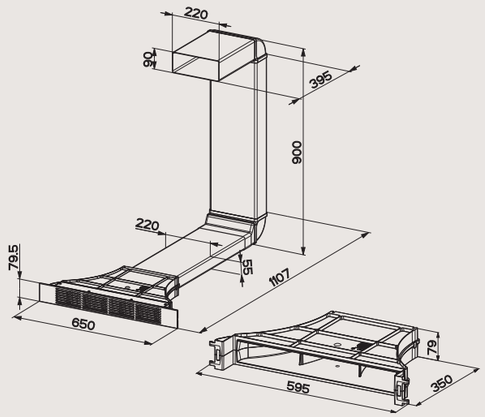
- 1 x flat duct, 200 x 90 x 300 mm
- 2 x vertical 90° bends, 220 x 90 mm
- 2 x flat ducts, 200 x 90 x 700 mm
- Recycling kit H100



KIT GALILEO 60*

Recycling Kit H100
cod. 112.0626.657

- 2 x vertical flanges (rear and front) for connection to the motor
- 1 x flange with seal, 220 x 55 mm
- 1 flat duct, 220 x 55 x 60 mm
- 1 x vertical 90° bend, 220 x 55 mm
- 1 x flat reducer, 90-55 mm
- 1 x flat duct connector, 200 x 90 mm
- 1 x flat duct, 220 x 90 x 500 mm
- Recycling Kit H100



KIT GALILEO 80*

Long lasting Recycling Kit H80
cod. 112.0605.735

- 1 x flat duct, 200 x 90 x 300 mm
- 2 x vertical 90° bends, 220 x 90 mm
- 1 x flat duct, 200 x 90 x 700 mm
- 1 x flat reducer, 90-55 mm
- 1 flat duct, 220 x 55 x 60 mm
- LL H80 kit

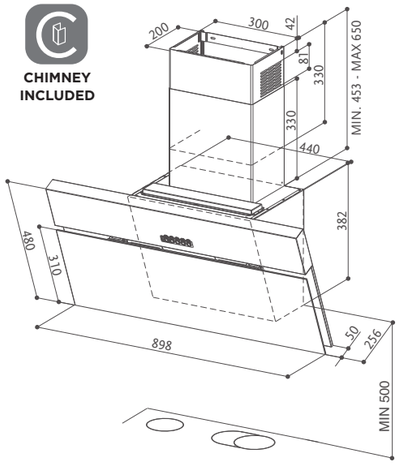
ECO FUNCTION:
change of air with minimum consumption and maximum silence.

THE POWER OF SILENCE.
A vertical hood with elegant, essential design on the outside and amazing innovation inside. Onyx-V features SIL & STILL technology to ensure a continuous exchange of air in the kitchen, in complete silence and with very low consumption.
Is it on or off ? The only way to know the hood is working is the green function indicator, which turns off automatically after 24 hours. The impressive suction power and amazing silence of Onyx-V creates the ultimate comfort in your home. Onyx-V is as efficient as it is silent, and is rated energy class A++.



To be installed at a minimum distance from the hob of **50 cm**.

FLAT ON THE OUTSIDE, ARIES TECHNOLOGY ON THE INSIDE. TWICE AS UNIQUE.
Twice is the perfect fusion of design and performance. This flat vertical hood is the work of the designer who created the acclaimed Talìka hood, and his unmistakable style emerges clearly from its rigorously essential lines. The glass from which it is made gives Twice the appearance of a latest-generation touch screen device. The hood's elegant, refined body encloses innovative, precision technology – a brand new Aries blower for superior suction. Maximum performance with minimum noise from a Faber masterpiece available in two different colours.

UNCOMPROMISING TECHNOLOGY AND DESIGN BY COLOMBO FOR A HOOD THAT GOES BEYOND INNOVATION.

The Pyana hood is the result of reinforced collaboration between Faber and the internationally recognized designer Carlo Colombo.
This vertical hood defines the ultimate in style and performance. Pyana features a precious, glossfinish body with gently rounded corners and an internal glass panel with an exclusive opening system. The hood is available in two colour variants. Customers can also choose between two advanced blower technologies: The Nautilus or the new Aries, both grant to deliver superb efficiency with minimum consumption and, of course, maximum comfort.

IMPROVING PERFECT IS POSSIBLE!

Faber's famous vertical hood is re-inventing its role as "window over the hob" by adopting the latest Nautilus technology.
The new Nautilus blower not only improves performance but makes Talìka an even more desirable addition to your kitchen by reducing noise.
New comfort from a lightweight, and ultra slim hood now available in new finishes.

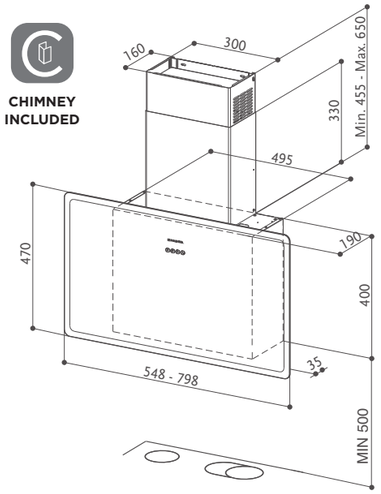
A VERTICAL HOOD WITH THE LATEST NAUTILUS TECHNOLOGY.

Glamour by name and nature, the Glam-Fit hood is defined by a minimal, contemporary style that shows elegance in every detail.
Its clean, essential lines, complemented by a glass surface and an elegant clear surround, add refinement to any kitchen and conceal Faber's exclusive Nautilus technology.
The first ever completely flat, vertical glass hood, Glam-Fit also features an ultra-thin body of only 15 cm. Impressive performance and miserly consumption place it in energy efficiency class A. Glam-Fit comes in two finishes, black and white, both equally striking and typically Faber. Glam-Fit is also available in a "small" 55 cm version.



To be installed at a minimum distance from the hob of 50 cm.

52 DB(A) MAX CAPACITY

ECO FUNCTION:
change of air with minimum consumption and maximum silence.

AS SILENT AND PRECIOUS AS PURE AIR

Onyx-T is the quietest of all T-Shape hoods and guaranteed to surprise which allows an ultra silent mode. The hood's stylish design conceals FABER's exclusive SIL & STILL technology which allows functioning in ultra-silent mode at a sound level of less than 40 dB(A). Maximum comfort, minimum energy consumption and complete freedom to enjoy your home thanks to a special function that continuously exchanges air.
This Eco funcion switches off automatically after 24 hours.
What more can we say?
Faber technology leaves you speechless!

EXCLUSIVE, CONDENSATION-FREE COMFORT
With the Steam Off System, an exclusive Faber technology, in addition to the suction phase, the hood is not only capturing air but even blowing air creating a vortex that helps convey the steam. This stops condensation on the product and on the cabinets. DOUBLE AIR ACTION TO COMPLETELY ELIMINATE CONDENSATION.

STYLE IN EVERY DETAIL, TECHNOLOGY IN EVERY BREATH.
Today, the world is one nation, the whole planet a global village. And the pleasure of country living has reached even the biggest metropolis. Today is the era of Thea. This is a hood that looks beyond the walls of your kitchen, opening up new horizons in design and redefining life in the home. But take nothing for granted! Despite its vintage soul, this hood packs the performance needed for today's industrial world.

FOOD SET

FOOD SET cod. 112.0524.622

This professional food set boasts impressive and exclusive characteristics, including a base made from Krion, produced with the **Krion Eco-Active Solid Technology**™.
This new technology present in Krion™ Eco-Active resides in incorporating a series of activators into the product, specially developed by Krion, which when in contact with any type of light, provide Krion™ Eco-Active with the following new properties: Air purification, Anti-bacteria, Selfcleaning and Elimination of chemical products.
A large number of compounds that are dangerous to our health have been eliminated, such as pesticides present in our surro ndings, and especially in the foods we consume.

The base is specially shaped to contain the set's washable food bag and solid wood cutting board. In this set, three practical accessories combine to form a unique solution.
The Thea food set is ideal for the elegant presentation of bread, charcuterie, cheese and fruit, and for use as a simple but chic platter to serve guests at important occasions with rustic aperitifs and finger foods.

FEATURES

Material: Krion base
Finish: White
Non-porous surface
Anti-bacterial properties
Made from fully recyclable, ecological material
Tough and long-lasting
Dimensions: 440x200x10 mm

MAINTENANCE
Dishwasher washable.
Self-cleaning: liquids and dirt can be cleaned from the surface of the material with greater ease, reducing the use of detergents.
To remove stubborn dirt and surface scratches, clean with a dry, slightly abrasive kitchen sponge.

Material: Solid wood insert
Finish: Durmast

ORDINARY MAINTENANCE: Wite with a damp sponge and dry with a cloth.
SPECIAL MAINTENANCE: To nourish the wood and keep the colour bright, pass a cloth dipped in a few drops of cooking oil.

KIT MENSOLA

SHELF KIT

KIT MENSOLA ROVERE cod. 112.0527.474

This wood shelf kit is a great way to add value to your kitchen. Simple and compatible with all styles, this accessory blends great functionality and attractive design.

FEATURES

Material: Wood
Durmast
Shelf bracket: Internal
Dimensions: 600x400x30 mm

ORDINARY MAINTENANCE: For normal cleaning, simply dust the top with a soft cloth.
SPECIAL MAINTENANCE: Every 2 or 3 months the wooden surface must be polished using a commercially available beeswax product in a colour specific to the type of wood.

NEVER use aggressive detergents or water, as these may damage the surface varnish over time.

We recommend combining it with Thea and Thea Island hoods that have frame in the same durmast wood finish.

Perfect in their every detail, extremely powerful, ideal for all-round kitchen use. Island workstation kitchens take on a central role in the house and in daily family life: cooking instantly develops into personal flair, passion, choice, an intimate, private activity. Island decorative hoods are attractive from all viewpoints, with perfect form in all its features: there is no hidden side or corner not seen by the naked eye. Characterised by symmetry and uniformity, illuminating the centre of our family lives.

Country grey matt - CG MATT

UNIQUE PERSONALITY EXPRESSED IN PERFORMANCE.
Some ideas cast new light on everything around them: even colours, fl avours and everyday gestures. In a dull, uniform world they epitomise newness, inspire beauty and establish a new sense of proportion. Chloè XL Island is one of these ideas. Designed to take style to a higher level, Chloè XL Island adds the excitement of broader horizons and new dimensions to your kitchen.

FOOD SET

FOOD SET cod. 112.0524.622

This professional food set boasts impressive and exclusive characteristics, including a base made from Krion, produced with the **Krion Eco-Active Solid Technology™**.
This new technology present in Krion™ Eco-Active resides in incorporating a series of activators into the product, specially developed by Krion, which when in contact with any type of light, provide Krion™ Eco-Active with the following new properties: Air purification, Anti-bacteria, Selfcleaning and Elimination of chemical products.
A large number of compounds that are dangerous to our health have been eliminated, such as pesticides present in our surroundings, and especially in the foods we consume.

The base is specially shaped to contain the set's washable food bag and solid wood cutting board. In this set, three practical accessories combine to form a unique solution.
The Thea food set is ideal for the elegant presentation of bread, charcuterie, cheese and fruit, and for use as a simple but chic platter to serve guests at important occasions with rustic aperitifs and finger foods.

FEATURES

Material: Krion base
Finish: White
Non-porous surface
Anti-bacterial properties
Made from fully recyclable, ecological material
Tough and long-lasting
Dimensions: 440x200x10 mm

MAINTENANCE
Dishwasher washable.
Self-cleaning: liquids and dirt can be cleaned from the surface of the material with greater ease, reducing the use of detergents.
To remove stubborn dirt and surface scratches, clean with a dry, slightly abrasive kitchen sponge.

Material: Solid wood insert
Finish: Durmast

ORDINARY MAINTENANCE: Wite with a damp sponge and dry with a cloth.
PECIAL MAINTENANCE: To nourish the wood and keep the colour bright, pass a cloth dipped in a few drops of cooking oil.

KIT MENSOLA

SHELF KIT

KIT SHELF cod. 112.0527.474

This wood shelf kit is a great way to add value to your kitchen. Simple and compatible with all styles, this accessory blends great functionality and attractive design.

FEATURES

Material: Wood
Durmast
Shelf bracket: Internal
Dimensions: 600x400x30 mm

ORDINARY MAINTENANCE: For normal cleaning, simply dust the top with a soft cloth.
SPECIAL MAINTENANCE: Every 2 or 3 months the wooden surface must be polished using a commercially available beeswax product in a colour specific to the type of wood.

NEVER use aggressive detergents or water, as these may damage the surface varnish over time.

We recommend combining it with Thea and Thea Island hoods that have frame in the same durmast wood finish.

The Suspended cooker hoods were created to represent the perfect integration of design and wellbeing. The design is absolutely extraordinary and astounds the observer due to its ability to revolutionise the concept of cooker hood lighting, transforming it into a real point of light for the kitchen area. The products are technologically advanced and perfectly shaped, offering the user freedom of movement within the cooking zone. In a simple movement, elegance becomes functionality.

**ADVANCED TECHNOLOGY,
UNIQUE DESIGN**

As beautiful as its name suggests, the Belle hood features a design that is both eye-catching and elegant. Its double panel creates an eff ect reminiscent of the petals of a flower. Available in two refined fi nishes, the original, asymmetrically shaped Belle hood is made even more desirable by Up & Down action and by the technology that has made Faber the number one name in kitchen hoods.

THE CONICAL HOOD. A MODERN CLASSIC

A thin line of stainless steel enriches the top part of this original, conical hood, which is also available with a bottom section in a different finish. The contemporary, essential design of Céline is made even more striking by Up& Down technology. The hood can be raised to the ceiling when not in use and lowered again whenever its extraordinary performance is needed. Céline comes in a choice of matt country grey and warm white.

HOO-B COOKTOP,
THE NEXT-GENERATION FITTED HOOD

A sophisticated yet minimalist look for the new fitted HOO-B hood, which is embellished with a special aluminium trim that makes it even more stylish.
The glass panel fits over the hob without interrupting the continuity of its forms and lines, guaranteeing the utmost quality at all times. The Touch control commands also make it possible to operate the hood and induction hobs with the touch of a finger.
When in use, HOO-B opens, lifting its cover and revealing its extraction surface. When you have finished using it, the cover goes back down to create a single worktop again.
For those that love pure minimalism, the new model also comes in the HOO-B Glass version with no aluminium trim.

ECO FUNCTION:
change of air with minimum consumption and maximum silence.

YOUR KITCHEN'S SILENT GUARDIAN.
Look up and you'll appreciate its linear design, but otherwise Onyx-C blends into the background, and all you notice is the pure air.
Onyx-C incorporates FABER's exclusive SIL & STILL technology. This new technology includes an Eco button that activates an ultra-silent mode to bring your kitchen maximum comfort with minimum energy consumption. The button's green light is the sole proof the system is working. The silence is broken only by applause for the Faber technology that places the hood in energy effi ciency class A++.

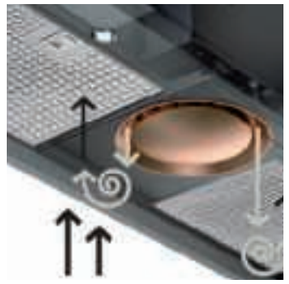
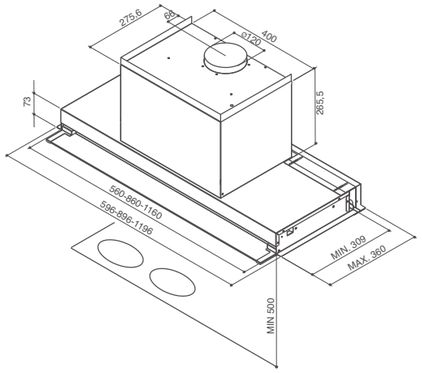
EXCLUSIVE,
CONDENSATION-FREE COMFORT
With Steam Off System, the exclusive Faber technology, in addition to the suction phase, the hood also emits air jets that create a vortical motion and acceleration and help to convey and capture the steam.
This puts an end to condensation and its depositing under and around the hood.
DOUBLE AIR ACTION TO COMPLETELY ELIMINATE CONDENSATION.





To be installed at a minimum distance from the hob of 50 cm.

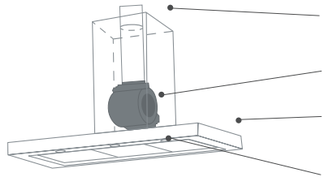
INSTALLATION

ABC OF THE HOOD

The extraction hood expels fumes and steam out of the kitchen. It is the most effective solution.

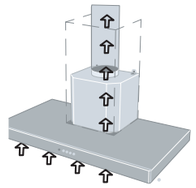


Air ducting system (brings air out)

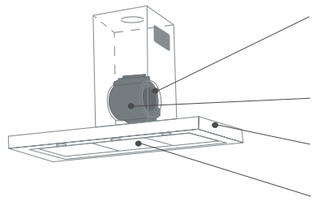
Extraction group (sucks air)

External body

Anti-grease filter (protects the motor from grease damage)



The recycling hood filters the fumes and steam from the air and then returns it to the kitchen.

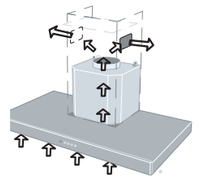


Charcoal filter (filters the air from the odours - only with filtering hoods)

Extraction group (sucks air)

External body

Anti-grease filter (protects the motor from grease damage)



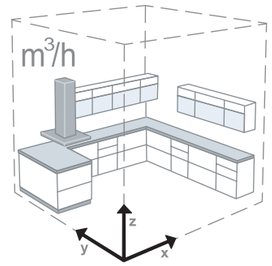
CHOOSE THE RIGHT HOOD

The necessary extraction capacity is determined by the volume of the kitchen. An effective hood changes the air of the kitchen 10 times per hour. A powerful motor is quieter and uses less energy because it is effective at low speeds.
-A hood does not create noise disturbance if its capacity is sufficient without exceeding 55 dB(A) of sound power.
-A powerful motor can be efficient even at lower, quieter speeds.
1 Fan Handbook - F. Bleier 1998

Example: A 15 m2 kitchen which is 3 m tall requires a hood which aspirates at least 450 m^3/h.
Infact: 15 m^2 x 3 m x 10 = 450 m^3/h
Now consult the performance table found in the product catalogue.
The hood is efficient if an equal or higher capacity value is found in one of the speed columns.

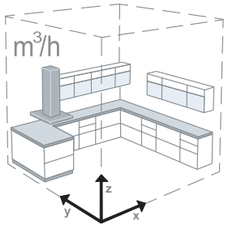
EFFECTIVENESS = kitchen m^2 x kitchen high x 10 changes of air

Speed	1	2	3	4	INT
Air capacity IEC point	110	195	260	313	430
Pressure	-	-	-	-	-
input	30	45	55	70	100
Noise level	48	53	58	62	69

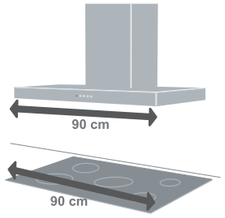


INSTALLATION

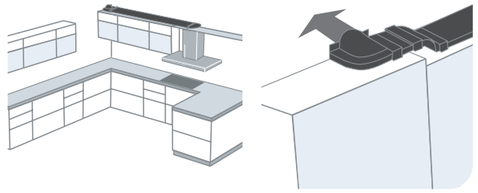
Proper installation begins with an inspection. When choosing a hood, you should know:



Kitchen volume (which determines the necessary aspiration capacity). See section "Choosing the right hood."

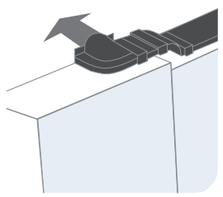


Length of the cooking top (the hood is generally as long as the cooking top area).



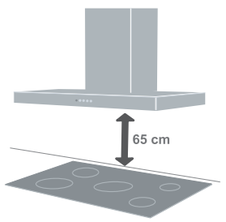
The position and distance of the exit hole (very long and very curved right-angled tubes limit hood efficiency).

Italian D.M. 37/08 requires two aeration holes which communicate with the external wall in the presence of gas-working equipment.
1. an entrance hole for oxygenising the area, to be made in the lower part of the wall of the room which communicates externally.
2. an exit hole for fume discharge, to be made in the upper part of the wall which communicates externally (or in a chimney flue dedicated exclusively to this use).
If the hood aspirates, the exit hole can be used as a terminal conduit that carries the air outside.



Product integrity
- Check the integrity of the hood upon opening.
- Make sure that the hood is in good conditions and has not been damaged during transport.
- The hood must arrive with its guarantee and instruction manual. Verify the receipt of any optionals (i.e. remote control).
ATTENTION: Do not install the hood if it is damaged. Have it substituted at no charge with a new one, otherwise you may be required to pay for any service assistance. Do not remove any protective films prior to installation.

Installation distance



The hood is to be installed at a minimum distance of 65 cm from the cooking top, except for particular models where is specified in the technical drawing and instructions manual.
ATTENTION: the product guarantee will not be considered valid if this distance is not respected.
The hood may not reach declared performance levels if the distance from the cooking top exceeds 75 cm.
Some vertical-installation models (ex. Cocktail) are to be installed lower. Check the product's technical manual.

Inspection

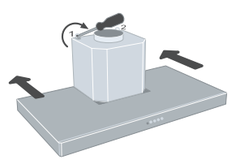
1 - Turn on the motor
2 - Switch on the lights
If the hood is an extraction hood, verify that it is properly connected to the exit tubing.
If the hood is a filtering hood, verify that the charcoal filters have been inserted.

First cleaning

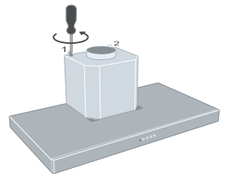
- Remove the protective films
- Remove impurities with a damp sponge and a small amount of neutral soap
- Rinse with a damp cloth
- Dry with a soft cloth. If the hood is in stainless steel, continue with a steel glaze
- You can give stainless steel hoods a protective treatment with the Faber Clin&Clin tissue

EASY CUBE

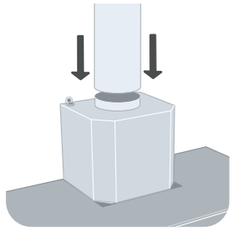
Faber hoods are easy to install because they have EASY CUBE:



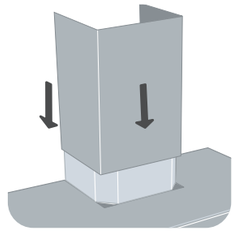
Hang the hood



Align

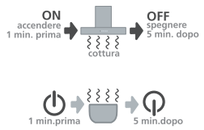


Connect tubing



Insert the chimney

USE AND MAINTENANCE



Switch on the hood a minute before cooking begins to create air flow that channels fumes and steam toward the aspiration surfaces.
If necessary, leave the hood switched on even after cooking is finished so that all steam and odours can be properly aspirated.

- Wash the metal anti-grease filters by hand or in the dishwasher every two months[1]
- Replace synthetic anti-grease filters every two months
- Regular filter maintenance guarantees efficient hood use
ATTENTION: grease deposited on the filters is inflammable: be sure to perform regular maintenance

[1] These intervals of time refer to a regular use of the hood, approximately 3 hours per day

Hood cleaning
- Remove impurities with a damp sponge and a small amount of neutral soap[2]
- Rinse with a damp cloth
- Dry with a soft cloth, if the hood is in stainless steel, follow the steel brushing
- Clean the internal hood conduit once a year

[2] Acid-based cleaning products can damage hood surfaces

ANTI-ODOURS FILTERS

Long lasting

3
ANNI
MAX

Faber has developed a new, re-usable active carbon filter. Thanks to the multi-layer technology, the Long Lasting filter further increases filtration efficiency, with the double layer using an initial pre-filtration to capture the largest particles, and a second, more concentrated filtration to guarantee optimal air cleanliness.
The filter can be washed in the dishwasher every 3-4 months[1], for a maximum of 3 years and dries at room temperature in a vertical position to allow the water to drain out. Alternatively, it can be placed in an oven at 50°C.

[1] Normal use cooker hood, by around 3 hours per day

High performance

6
MESI
MAX

High-efficiency filter with a highly-concentrated carbon micro-granular structure that can guarantee more than 80% filtration capacity of
intake fumes and a duration of up to 6 months, double that of a normal charcoal filter, making for economic savings of more than 20%.

CERAMIC FILTER

Innovative charcoal filter that can be rigenerated in the oven at 200° every 2-3 months and allows to reach high absorption efficiency

CLIN & CLIN CLEANING LINE

Clin&Clin revitalising paste

Removes marks, spots and small rust stains caused by daily use, restoring a natural shine to steel surfaces.

Clin&Clin protective tissues

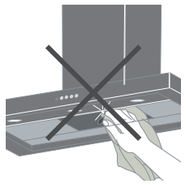
Protect and maintain the beauty of steel surfaces over time.
Practical and disposable. To be applied on clean, dry surfaces.

QUALITY AND SAFETY

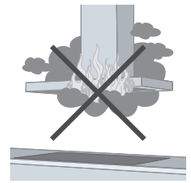
Faber hoods benefit from 60 years of competence in the treatment of kitchen air

- We were the first in the kitchen hood sector to obtain an ISO 9001 company qualitysystem certificate.
- System integrated with Quality, Safety and Environment certified by SGS respecting the ISO 9001:2000, OHSAS 18001 and ISO 14001 norms.
- We have received the SGS Excellence Certificate, the absolute first in the world, number 001.
- All Faber hoods conform to European safety standards (EC mark of conformity), and have also been certified by the IMQ, a reliable, independent organisation further guaranteeing clients on quality (IMQ mark of security).

FABER HOODS ARE DESIGNED FOR SAFETY



Hammered internal edges and tempered glass to avoid risks of cutting.



Thermo-protected motors and self-extinguishing plastics help avoid any risk of fire.
Electronics are solid state, cables and connections are all placed correctly to avoid electric shock or dangerous sparks.

All Faber hoods have undergone safety and performance tests.
Aspiration and noise capacity have been measured according to standard norms:
- EN 61591
- EN 60704-3
unique specifications for surveying kitchen hood performance.
ATTENTION: Comparisons between diff erent brand hoods should be carried out on complete data obtained according to these standards.
The Faber laboratory is NEMKO and IMQ certified.

ASSISTANCE

Contact Number
0732.691691

Our toll Contact Number can be reached from Monday to Friday from 8am to 8pm and Saturday from 8am to 2pm for the following service assistance:
- Information about products
- Information about shop branches
- Information about where to purchase spare parts and accessories
- Activation of technical assistance request
- Product or service complaints

The cost of the call may vary depending on the operator used.
Please consult the rates of your operator.

Faber Technical Assistance is also active in Europe

Check the website www.faberspa.com for phone numbers

All Faber products are covered with a 2-year “Full guarantee”

“Full guarantee” that covers any compliant defects which might be revealed on the hood over this period.
This guarantee does not cover defects not attributable to Faber such as those caused by erred installation, by any use not compliant with the instructions detailed in the instruction manual or by damage caused during transport.

The performance shown in this catalogue is declared in accordance with the new Code of Conduct signed by the most qualified European manufacturers members of CECED (European Committee of Domestic Equipment Manufacturers), a strict code for transparency which establishes clear rules to measure air flow and noise level for hoods, common to all cooker hoods manufacturers:
• air capacity according to IEC/EN 61591 method
(with the hood fitted using a ducting pipe)
• noise level according to IEC/EN 60704-3 method (sound power)
